HRG signs new security deal

Source: Business Travel Europe

HRG signed an agreement with security advice company Red24 to provide security alerts tailored to clients' specific requirements and traveller itineraries.

The new service which works with HRG's traveller tracking service, Travel Watch, will send out alerts to companies and travellers by e-mails and text messages.

HRG said the aim was to make sure clients and their travellers were aware of any possible problems, like security issues or strikes, both at the time of booking and during the trip.
